

Landscaping update

25 February 2019

Landscaping works continue to progress across the project area and are on track for planting to start in March / April 2019. This will include:

William Street Park

- The T2T Alliance has been working with representatives from the Croydon Church of Christ to finalise the memorial that will be located at the northern point of the William Street Park. The memorial is being built using a red granite stone to depict the roof of the Church and will include the foundation stone laid in 1911, along with an etching of the building and text acknowledging its service to the community.
- The Corten steel art panels to be positioned on the back of the noise wall are in production (see design below). The five panels will extend approximately 2.3 metres high and 5.4 metres wide.
- Landscaping and installation of the irrigation system has commenced. The shelter at the southern end of the park has been constructed and the BBQ installed along with the concrete edging.

Detention basins

Flanders Street

- Earthworks around the detention basin have been completed and topsoil and mulch laid. The adjacent swale drain has also been completed.

Lamont Street

- Earthworks and concreting works have commenced and are ongoing.

Harriet Street

- Concrete and gabion works along with top soil and placement of mulch have been completed

Forster Street

- Earthworks have been completed, gabion walls constructed, with placement of top soil and mulch ongoing.

Princes Street

- The earthworks and concrete base works have been completed, gabion walls are nearing completion and placement of top soil and mulch is ongoing. Current activities in this location include construction of the shelter and brick seating.

Euston Terrace and Day Terrace (between South Road and Queen Street / Elizabeth Street)

- Irrigation has been installed and the placement of top soil and mulch is nearing completion.

The T2T Alliance has been working with designers and the City of Charles Sturt to incorporate red bricks from demolished properties into the overall design. The salvaged bricks will be located in a number of open space community areas including William Street Park, Jervis Avenue Park and Princes Street basin.

Sketch depicting seating using red bricks that were salvaged during demolition

Please note the irrigation systems installed are pending connection to the water mains.

We will keep you updated as works progress.
