

The South Australian Government is working with the Australian Government to realise a fully upgraded non-stop North-South Corridor. Both governments are working together to build upon the significant amount of planning work that has been undertaken with each contributing \$448 million towards the construction of the \$896 million Torrens Road to River Torrens Project. This includes the recently announced scope extension which includes the section of South Road between Pym Street and Torrens Road in Croydon Park resulting in the grade separation of South Road and Torrens Road and extending the lowered motorway by approximately one kilometre.

Demolition works between Torrens Road and Royce Avenue will commence in late February 2016.

## About the demolition works

- The demolition works will be undertaken by the Department of Planning, Transport and Infrastructure's prequalified contractor.
- Prior to the demolition works, an asbestos assessment will be completed and any identified asbestos will be removed. All asbestos removal works will be carried out by a licensed asbestos contractor in accordance with the Environmental Protection Authority Guidelines. These measures will ensure the safety of the community and workers.
- The T2T Alliance will provide an advance notice to local residents before works begin. The demolition works will occur Monday – Saturday, 7am – 5pm (and Sunday 9am -5pm, if required).
- Existing structures located on boundaries will be replaced with a 'like for like' fence, if required.
- Security patrols will be engaged to maintain a presence throughout the project area. Police patrols will also monitor the project area and can be contacted on **131 444**, or **000** in an emergency situation.

## Dust management

Demolition works may create some short-term disturbance to nearby residents. Dust cannot be completely eliminated, however works will be managed to minimise the disturbance.

The works area will be regularly watered and street sweepers used where necessary. Inspections will be undertaken to ensure that the works are undertaken safely and managed appropriately.
